Persons are going to use remote -eeg like ability which allows the reconstructing of real time vision /natural vision -(it allows people to spy out of your eyes in real time - clasified top secret - done by reconstructing backscatter of emf off the brain of a person and reconstructing the electromagnetic field data off the surface and regions of the brain in a temporal spatial manner and then running them through non linear reconstruction methods and neural networks to render the output of the neuron firing amplitudes to pixels (to render the image someone sees out of their brain from the visual cortex processing center /occipital lobe electromagnetic field data reconstructed from backscatter (jist - rest is highly complex and classified top secret)

Persons are going to use it and said it has been used to spy on women of White House staff naked at home .
