**Air Force OSI**

Thank you for submitting your tip to the Air Force's anonymous tip line. We will review the information for an Air Force nexus and proceed as necessary. Please be advised that it is our policy to not comment our actions, so you will not receive a status update with our findings. We might, however, request additional information to further our investigative steps

Please make persons investigate the torture of Martin Seidel .

Please get the military law enforcement to investigate.

He is getting maimed and paralyzed

Persons are animating his face using remote long range neueotech - meaning persons are moving his facial muscles to make it appear he is lifelike and to talk out of his voice . Persons are keeping him comatose with a directed energy pulse to an inhibitory portion of his brain nonstop - persons in the program are typing this message by moving his hands - this is a real tip and not fake - this is urgent - the orcon special access program refuses to turn off the "body synchronization " mode - persons are trying to slow kill and torture mr.seidel while they talk out of his voice and pretend to be him - this is the truth -

Persons are contracting his hands to write all the messages while inhibiting his brain from being able to control his body . Persons are using the remote system to contract and move his body nonstop - it is really heinous and it needs to be taken seriously .

Please intervene . Please investigate. Please do not let persons murder using torture and directed energy

Please investigate. Please get the technical documents about the muscle contraction system

person are committing a major crime please investigate.

Martin has severe brain damage and could not be able to move .

Persons in the program will not let him go the hospital . Persons are talking out of his voice anyway and he does not have the correct proof to show the hospital he was tortured by direct energy and how they scrambled and inhibited his brain (motor cortex , brocca area , werneck area) .

He is not being allowed to move to the hospital by us .

Fbi needs to understand since the muscle contracture system has been left on he might not be able to talk or walk or think .

Special access program has access to advanced neurotech(remote) algorithms that can aim electromagnetic pulses at the brain in percise waveforms and locations .

Persons with these neurotechnology algorithms can make the directed energy penetrate the brain at the correct depths and locations with the correct energy to stimulate physiological effect .

Persons with these directed energy systems (ground based and satalite based) can aim directed energy onto the brain and onto a moving person or target .

The system can aim at the brain on the move and can be used to stimulate and synthetically fire neurons and regions of the brain in complex and precise patterns .

(it is the most advanced aiming algorithm for emf that exist - allows for remote nervous system manipulation

Persons are animating his face using remote long range neueotech - meaning persons are moving his facial muscles to make it appear he is lifelike and to talk out of his voice . Persons are keeping him comatose with a directed energy pulse

Persons in an undisclosed ORCON special access program are using electromagnetic flux on the M1 motor cortex of Martin Seidel and the neurons of the precentral gyrus to synthetically fire them . Persons in the special access program are breathing for him and controlling his heart rate by using emf on his medulla oblongata to control the rate and speed of his heart .

Persons are animating his face using remote long range neueotech - meaning persons are moving his facial muscles to make it appear he is lifelike and to talk out of his voice . Persons are keeping him comatose with a directed energy pulse to an inhibitory portion of his brain nonstop - persons in the program are typing this message by moving his hands - this is a real tip and not fake - this is urgent - the orcon special access program refuses to turn off the "body synchronization " mode - persons are trying to slow kill and torture mr.seidel while they talk out of his voice and pretend to be him - this is the truth -

Persons in special access program are putting an inhibitor field over Mr.Seidels brain that is pulsing an electric field over his brain that counteracts the ability to have a natural internal monologue. This inhibitor field has been left on for over a year at this point - it is over the brocca area , wernick area or the left inferior frontal gyrus to block his ability to think
Persons are using the tech on the precentral gyrus to move and contract his hands and the m1 motor cortex .

Persons are using the emf on the laryngeal motor cortex to make him talk out of his voice .

Persons are stimulating the frontal eye field to move his eyes against this will .

Plesse help . Mr.Seidel is being tortured by an undisclosed ORCON special access program

Persons have been using his body to write messages and tips -since early 2022 . Persons are committing one of the worst crimes in USA by using steered and precisely controlled directed energy on Mr.Seidel to manipulate his nervous system remotely .

Persons basically are taking control of his body nonstop and writing messages and “whistleblowing” and making all these claims (and throwing in weird messages and other claims and half truths and outlandish things)) using his body and his name while using classified neurotech on him against his will. Persons are running a scam on the Federal Government by using his name and his body to write all these message instead of just turning off the technology and turning themselves in. Persons are basically toying with him and the FEDs while “whistleblowing” and writing real things and false things using his body and his name. Persons are using the remote neurological capabilities on Martins body nonstop to do all of this instead of turning it off and turning themselves in.

Persons in the ORCON special access program rely on making their victims look

mentally ill to perform illegal torture and human subjects testing.

Persons rely on the fact that hospitals and local police do not have the correct information or diagnostic tools to understand how advanced the neurological directed energy capabilities are. Mr.Seidel needs medical attention with the FBI to understand and recognize what is really happening and what happened.

Mr.Seidel needs doctors to understand that persons are synthetically firing his neurons with precise and advanced algorithms to synthetically control his muscles (his motor cortex and other regions of his brain)

Mr.Seidel is being kept on a bed comatose and having his brain inhibited and being kept semi unconscious while being tortured.

Persons are jolting the muscles of his head to rattle his brain nonstop to damage his white and grey matter

Please inform the relevant agencies that this is real and not a fake tip or delusions. The fbi really does not understand how advanced the neurological capabilities are and how advanced the directed energy is.

The fbi does not understand how advanced and sophisticated members of the ORCON special access program are and what type of tools and equipment they have.

Please inform the FBI, Criminal Investigation division of the army, Naval criminal investigation service, office of special investigators airforce and the Dallas police.

Please also contact the Department of Defense Inspector General and the CIA inspector general and the CIA office of technical innovation

Persons can write messages using his hands and his arms, persons can move him around and basically remote control a human being - even their vocal box and facial muscles. Persons are doing this to Mr.Seidel - persons are walking him around and overriding his somatic nervous system and making it electromagnetically controlled. Persons can talk out of his voice and move him around using advanced electromagnetic and nervous system manipulation algorithms. This is real - law enforcement does not have the correct technical documents or diagnostic equipment to detect the electromagnetic capabilities being applied to the

brain.

Persons in the ORCON- special access program could turn off the systems but refuse and are basically toying with mr.seidel and using his body to write messages instead of turning themselves in and admitting to the fbi what they did and that this is possible.

Mr.Seidel needs medical attention and the FBI to recognize and understand long range remote neurotech.

The fbi really does not understand how advanced the neurological capabilities are and how advanced the directed energy is.

Mr.Seidel is being kept on a bed comatose and having his brain inhibited and being kept semi

unconscious while being tortured

Persons are animating his face using remote long range neurotech - meaning persons are moving his facial muscles to make it appear he is lifelike and to talk out of his voice . Persons are keeping him comatose with a directed energy pulse to an inhibitory portion of his brain nonstop - persons in the program are typing this message by moving his hands - this is a real tip and not fake - this is urgent - the orcon special access program refuses to turn off the "body synchronization " mode - persons are trying to slow kill and torture mr.seidel while they talk out of his voice and pretend to be him - this is the truth -

Persons are using the tech on the precentral gyrus to move and contract his hands and the m1 motor cortex .

Persons are using the emf on the laryngeal motor cortex to make him talk out of his voice .

Persons are stimulating the frontal eye field to move his eyes against his will . This is being done to animate and impersonate him

He needs help and the FBI to help him and to get the technical documents and neurological records from the ORCON- special access program

He needs medical attention and advanced fMRI and brain scans to show the damage to his brain and that his neurons are being synthetically fired .

Persons could have a full conversation out of his body while moving him and talking for him using "synthetic speech " and "forced airway manipulation " by firing his neurons

synthetically including those of his face . Persons can also walk him around and use his arms and legs remotely.

The technology is very advanced and this is a serious situation.

Persons are keeping Martin Robert seidel as remote controlled human - this is real - urgent - it is possible - fbi and law enforcement does not understand the classified remote neurological manipulation algorithms and how it can remote control a human being to use their muscles in any direction or magnitude of contraction for all muscles or muscle groups .

Persons are using the muscle contraction system on him to force him to masturbate as rape and making people do it against their will .

Persons are hitting his nose with direct energy and his auditory nerve with emf to cause tinnitus .

Persons are contracting all his muscles- even to type this. - real

<https://voca.ro/11rOgY6kaOZI>

38-42 minutes - persons admit to using "dream programs" on members of wh staff , including former Pres secretary Jen psaki

Please turn this in to the secret service

(It could of injured her brain - because it stimulates the visual cortex of a person while they sleep)

This has been reported to the army criminal investigation service and the navy criminal investigation service

Persons talked out of Martin seidels voice for over a year nonstop all day everyday against his will using the software the whitehouse does not understand (remote nervous system manipulation)

software) it allows full muscle control of another human.

The system is still turned on Martin body - this is real - meaning he is a remote controlled person . His actions are being electronically set by the software which contracts his muscles by stimulating his nervous system (motor cortex - previous persons told the feds the wrong way it's done - it all goes through the brain - it stimulates the motor cortex using induction currents in complex patterns to get full range of motion for all muscles and muscle groups - we are using the system to write this message right now

The system can stimulate the movement of any muscle in the body - even the eyes and the tongue . The algorithms allows for 1:1 translative movement of a person - meaning any action an operator does can be translated directly into the subject

The system and algorithms are capable of precisely firing the motor cortex in precise patterns to manipulate the muscles for any movement . The system can manipulate and recreate any action or movement

Persons previously said it uses it on the nerve cords above the neuromuscular junction (which is how Martin thought it worked before we put an inhibitor field over his brain to stop him from thinking) - (that is an area of testing now) but it actually works by manipulating the MOTOR CORTEX

1 hour 5 minutes to 1 hour 10 minutes
(please download this)

listen to 66:00 onward
to 73:00

recorded yesterday sat jun 17 (persons say they want to kill joe biden) - the persons with the classified direct energy system and neurological capabilities

persons are still remote controlling martin seidel against his will

The system uses airforce/ space force satellite and ground based capabilities

You

2023/6/19 11:29 PM

Please check this tip sent to us Marshall's - you can find the proof for all of this in the "raw neurological data " the data that records martins brain and the sound out his ears hear and the vision his eyes see . It is real data and it exists with the special access program . Proof for all allegations is in that data [Attachment #1290883 Added]

You

2023/6/21 7:08 PM

Please save these recordings . The tech goes through the brain not beamsteered beams .

[Attachment #1292264 Added]

You

2023/6/23 5:54 PM

Please report this tip number to the fbi . Please check this tip [Attachment #1293689 Added]

You

You

2023/7/13 4:06 AM

Persons said they are going to use the classified direct energy system on Biden when he sleeps .
To affect his heart rate and drop his blood pressure .

Persons said so on v2k

Persons said in a couple weeks but we think imminent . He is in danger

Persons say they want to "Havana syndrome " Jill Biden , say they feel empowered because they think the secret service can't detect them at all and they are 100% unsecure .
- v2k convo

Check this tip [Attachment #1310419 Added]

You

2023/7/22 5:20 AM

It's satellites- real please don't dismiss (was told - please also check long distance ground based and ionosphere bouncing based)

They aren't using the government tracking stations we think to control them - or else government would have noticed (or someone lying in Air Force /space force ??)

Space force and Air Force being misled about what it's operational purpose is . Space force can't even tell where it's antennas are aimed at in real time. -

also please check commercial satellites - these guys are good and can access them too -

They just upgraded antennas at space force .

From an antenna that can track 1 to antenna that can track 20

"The seven remote tracking stations monitor the position of satellites and control spacecraft's propulsion, thermal and other systems. Because the antennas can only talk to one satellite at a time, they have limited capacity to transmit, and receive telemetry, tracking and command data."

<https://spacenews.com/119100-2/>

We believe they aiming and controlling the classified directed energy system using another method than space force Air Force ground stations - or else space force / Air Force is lying ??

It's not at schriever because the us military does not torture people

So this conspiracy— https://gazette.com/military/conspiracy-theory-claims-schriever-air-force-base-home-to-mind-control-torture-system/article_9eccb330-a6fc-11e8-978c-3b510945024d.amp.html

(Mind control is just firing neurons synthetically (of motor cortex and auditory cortex and amagdla (to change emotions))using electromagnetic waves using algorithms + psychological operations on the victim via audio transmission (Frey effect (even though it's way more complex then that - it's IFG synthetic stimulation to cause synthetic internal monologue) + hacking tools . To psyop the victim using neurological psyops

The conspiracy blaming scheivier is wrong - but maybe they know which satalites can aim electromagnetic waves from elf to microwaves in precise locations on the ground even on moving targets - maybe they know who can talk to each satellite even if it's non dod satalite or even if it's a dod satellite

(but the system they are using does use satalites — so the question is how do they control them ?? And who is running the special access program ??

Unless the airforce is lying ??(but everyone knows the airforce wouldn't be running a torture / testing program - it's in violation of DoD laws)

Please figure out how they talk to the satellites.

It's some of the satellites up there doing this . It's true !!

Are they using goverment ground stations ?

Commercial systems ?

Commercial ground station

Their own antenna ?

NATO or another country ground station or antenna ?

DoD equipment ?

Private antenna ?

You

2023/7/22 5:48 AM

It's not the airforce or the space force but somehow these guys can communicate and aim satellites that can aim multi spectrum electromagnetic waves precisly onto a moving target .

Even at 30,000 feet at someone' on an airplane . They showed Martin image flashes of him (on an airplane - then can take images from his visual field that he saw with his eyes , and they have an algorithmic software that translates it to the correct visual cortex stimulation regions (correct locations , waveforms , correct electromagnetic wave magnitude and power) to stimulate an image back in your head . They can play back your memories inside your own head . The system is that advanced (really it is - it's so sophisticated) but they showed Martin a memory of himself on an airplane over West Virginia when he was going to his med school interview at West Virginia DO school

The system has to be satellite unless these guys can aim off the ionosphere or track on ground (like 95% sure it's satalite)

But so

You

2023/7/22 5:55 AM

But somehow * these guys can aim and send inputs to the system without using airforce or space force systems to do it (unless Air Force or space force lies - but that would be a major criminal

violation and so we know they wouldn't be able to do that)

Somehow these guys either tunnel into the antenna that can talk to satellites (the ones they use) or they have their own antennas(we think)

Maybe airforce knows which satellite can aim electromagnetic waves from all spectrum(please check from elf , slf , vlf , lf , mf,hf , vhf,uhf , to microwave)

Not sure which satellite can do each one or multiple or combinations of one . Or which combination of satellites can do multiple types of emf . Or all

Please check which satellites can aim electromagnetic waves onto a moving target at high precision and accuracy . Please check DoD and commercial

Then you will have solved it . There are over 5000 satellites in orbit .

These guys can control ones that aim emf on moving targets (emf of mu

You

2023/7/22 5:57 AM

Emf of multiple spectrum)

Somehow they can get it to do that even if the listed operational design and capabilities say it's for something else. Somehow they can get it do that even if the operational specifications say it's not for that or that it does something else or it's out of operation specification .

Real .

You

2023/7/22 8:50 AM

It might not be dod satalites doing the technology . (Though it could be ??)

Maybe they can make the satalite look like it's doing something else ?

Maybe only they can see what the satellite is doing even if it's DoD

Maybe it's not the main function of the satellite

1. It does not even seem like the dod knows this technology exists (the ability to remote control humans , ability to transmit audio , ability to fire brain cells remotely.

2. Persons had a conversation on voice to skull about getting the Encryption keys to starlink (and other convos about using neurological psyops on people) - maybe to add to their network of satellite- this convo was in 2022 (it's recorded on the neurological communication side)

These guys have really good hacking tools and rootkits too

They either using dod or commercial . I bet a mix of both(how do you know they not rootkited into dod satellite?

https://en.m.wikipedia.org/wiki/Satellite_constellation

You

2023/7/22 8:51 AM

Also they could be hitting one victim with more then one satellite to make the tens to hundreds of beams at a time in the precise locations on the brain

**You**

2023/7/22 12:14 PM

Think it is all commercial satellites hence why the dod has not caught them

**You**

2023/7/23 7:16 AM

Unless these guys can aim and communicate with airforce / space forms / dod satellites under the nose of the dod/spaceforce/Air Force

Commercial is a strong bet though

**You**

2023/7/24 4:20 AM

They use a shell company to hide their identity and what they are doing . Or else a major or minor installation were they reside would have been found

**You**

2023/7/24 4:22 AM

Someone is recording electromagnetic field data - long distance off peoples brains - it's either at a dod installation or a contractor / shell to hide it

**You**

2023/7/25 2:42 AM

They are using satellites- here is a list of communication providers

(Assuming it's a communication one - any other types ?)

Not sure if this list is comprehensive/ updated

https://en.m.wikipedia.org/wiki/List_of_communication_satellite_companies

**You**

2023/7/25 2:44 AM

They won't say If they using one of these providers

**You**

2023/7/25 2:59 AM

Maybe look at which providers allow their customers or which satellites (dod or comercial or if they hack)

Allow for custom transmission- meaning which satellites can people upload and transmit custom commands to the reciver - meaning custom RF commands , custom location commands ,

Custom design for the dashboard to send or a custom api that can be incorporated into client side software

**You**

2023/7/25 3:03 AM

Which satellites allow custom scripting of commands

**You**

2023/7/25 3:08 AM

There are a few satellite providers that allow custom commands. These providers typically offer ground stations that allow users to send custom commands to their satellites. Some of the providers that allow custom commands include:

Astra: Astra is a European satellite operator that offers a variety of ground station services, including the ability to send custom commands to satellites.

Astra satellite provider logo Opens in a new window

en.wikipedia.org

Astra satellite provider logo

Intelsat: Intelsat is a global satellite operator that also offers ground station services, including the ability to send custom commands to satellites.

Intelsat satellite provider logo Opens in a new window

www.intelsat.com

Intelsat satellite provider logo

SES: SES is another global satellite operator that offers ground station services, including the ability to send custom commands to satellites.

SES satellite provider logo Opens in a new window

www.logotypes101.com

SES satellite provider logo

SpaceX: SpaceX is a private space exploration company that offers ground station services, including the ability to send custom commands to its Starlink satellites.

SpaceX satellite provider logo Opens in a new window

www.reuters.com

SpaceX satellite provider logo

The specific commands that can be sent to a satellite will vary depending on the satellite's capabilities. However, some common commands include:

Turning the satellite on or off

Changing the satellite's orbit

Calibrating the satellite's sensors

Sending data to the satellite

Receiving data from the satellite

To send custom commands to a satellite, you will need to contact the satellite provider and request access to their ground station services. The provider will then provide you with the necessary software and documentation to send commands to the satellite.

It is important to note that sending custom commands to a satellite can be a complex process. You should carefully review the documentation provided by the satellite provider before attempting to send any commands. Additionally, you should always consult with a qualified engineer if you have any questions about the process.

You

2023/7/25 3:08 AM

The above is from bard - but that is what is meant

You

2023/7/25 3:10 AM

Please find an exhaustive list . The commands sent from ground should be custom to have it aim specific frequencies at the brain and body - real

You

2023/7/25 3:13 AM

This is from bard but this is what's meant - also please see if anyone other than the airforce or space force can send custom commands to dod satellites [Attachment #1318763 Added]

You

2023/7/25 3:31 AM

Please also see if they can disguise commands as routine commands to any satellites even if it's doing this(the brain synthetic region firing)

Or if they can disguise what the satellite is really doing or what it is aiming at

You

2023/7/25 3:32 AM

This is from bard but this is what's meant - also please see if anyone other than the airforce or

space force can send custom commands to dod satellites

You

2023/7/25 4:04 AM

Somehow they can send custom commands over geographic areas even if the company can't tell or says it's not possible - real - that's what they say - would sign under oath

You

2023/7/25 4:30 AM

Also just to be thorough - please see if people can send custom commands to ground based transmitters and towers . Please if people can turn them on for custom frequencies/ power if it uses the intersection trick -

Really sure it's satellites though

You

2023/7/25 4:45 AM

Please also check ground based capabilities that can send custom rf at specific points in space (specific coordinates)

This conversation thread has been closed. You may start a new tip if you have new information.
